

If you are a renter or homeowner who receives Home Energy Assistance (Fuel Assistance), you may be eligible for no-cost energy improvements that will make your home more comfortable **and** more affordable!

### **WEATHERIZATION**

Weatherization helps keep your home warm in the winter, cool in the summer, and lowers your overall energy costs. Services include **adding insulation to attics, floors, walls, and pipes, as well as air sealing and weatherstripping** in your home.

### **HEATING SYSTEM REPAIRS AND REPLACEMENTS**

If your heating system is outdated or not working properly, you may qualify to **have it repaired or replaced**. Eligible homes may receive air-source heat pumps (commonly known as mini-splits), boilers, or furnaces.

### **NEW APPLIANCES**

We perform an energy assessment on several of your appliances, including your **refrigerator, lighting fixtures, window air conditioners, and washing machine**. If we determine they are not running efficiently, we may be able to replace them.

### **HOW THE PROGRAM WORKS:**

- 1** Call to see if you qualify for these **no-cost** services.
- 2** If you qualify, a Home Energy Specialist from Action Inc. will visit your home to perform an Energy Assessment. You will also receive free LED lightbulbs, power strips, and energy saving tips.
- 3** Based on the results of your Energy Assessment, our team will coordinate with trusted, local contractors to perform work that improves the energy efficiency & comfort of your home - at absolutely NO COST to you. Your Home Energy Specialist will oversee the work from beginning to end. **Examples of installation work include insulating walls, sealing air leaks, replacing an outdated heating system, and more.**

**We're here to help you save money. Call us today!**
